

Brunswick News Responses from Ted Metz, Libertarian Secretary of State Candidate

Problem 1 – Lack of trust in the Electronic System. I will restore confidence in Georgia's Election system via hand counting paper ballots with full public transparency, enforcing signature match for absentee ballots, verifying voter ID, and allowing public audits.

Problem 2 – Third Party Access to Voter Data. I will return the Voter Registration Data Base to state control, end the contracts with Election Registration Information Systems, SalesForce and MTX Group, maintain clean voter rolls using the National Change of Address system and the Social Security Association Death Registry.

Problem 3 – Manipulation of Election Systems by Malicious Actors. I will enforce the State and Federal requirements that any voting system complies with all applicable laws, including Cyber and Infrastructure Security Act, Federal Information Security Modernization Act, Help America Vote Act, Voting Rights Act, and Title 21 of the O.C.G.A., which our current system does not.
