

WJXT/News4Jax 2022 questionnaire for congressional and state office candidates

Viewers' No. 1 issue: The economy

As Secretary of State I will be an ambassador to attract business and industry to Georgia to grow jobs and the economy. I will also work with the Labor Commissioner to encourage businesses to engage in training and apprentice programs, and work with the School Superintendent to implement and/or improve trades and crafts programs and coursework to teach young adults to become entrepreneurs.

Viewers' No. 2 issue: Voter rights/election integrity

My goal is to lawfully restore confidence in our elections through full transparency and verifiability as written into SB 202, allowing public access to ballots and the data necessary to prove the legitimacy of elections. Your vote should count for your candidate and not be turned into a fractionalized, manipulated data point like it is in the computerized systems.

Viewers' No. 3 issue: Gun rights/gun safety

“An armed society is a polite society. Manners are good when one may have to back up his acts with his life.” Robert A. Heinlein. I am strongly pro-Second Amendment. Bad actors are less likely to engage a person if they think the other person may be armed. Most mass shootings could have been stopped sooner if an armed citizen were present. Look to the Greenwood Park Mall shooting in Indiana as proof. I would like to see firearm safety and marksmanship programs put back in schools.

What do you see as the top three issues facing the state and nation over the next two years?

1. Energy - As power plants, natural gas, and oil production continues being shut down, energy prices will skyrocket, businesses will go bankrupt, especially the truckers that transport the goods and unemployment will soar along with inflation.
2. Food - since natural gas is the base for nitrogen fertilizers the domestic reduction in production coupled with the sale of LNG to Europe due to US Policies and Russian distribution disruption of oil, natural gas, and potash, domestic crop yields. which are down significantly now, and be worse next year which will cause further shortages prices to skyrocket.
3. Dollar Destruction - Printing money to finance the profligate spending by an out of control Congress has already lead to a recession and the worst inflation in American history which will force the FED to raise interest rates to levels not seen since the Carter Administration. People are already suffering and having to choose between buying gas to get to work or buying groceries to feed the family. Many families have already maxed out their credit cards and when the rates rise, there will be a historic bankruptcy crisis, a for closure crisis, and a banking crisis that can't be solved by money printing like they did in 2008. All of this will lead to a near total collapse of the financial markets, and Governments will crumble.

Do you believe Joe Biden is the legitimately elected president of the United States?

Joe Biden did not win the majority of the legitimate votes. That's a fact. If one judge had the courage to see the evidence, Biden would be removed.

In light of the Supreme Court ruling striking down Row v. Wade, would you propose or support additional laws either banning abortion entirely or guaranteeing reproductive rights?

In light of the Supreme Court ruling striking down Row v. Wade, would you propose or support additional laws either banning abortion entirely or guaranteeing reproductive rights?

I would not propose or support any additional laws on the subject.

How can you help voters in a way that others running for this office cannot?

Any elected official takes an oath to uphold the laws and the Constitution which is a constraint. I cannot legally act outside of the law, nor should any elected official. The better question is what will I do that others will not. When elected, I will ensure that all votes are cast within the boundaries of the law, ensure accessibility to the polls, provide access to the public to inspect, count, and recount the ballots, and not obstruct election challenges.

What would you hope to be remembered for accomplishing after serving in this office?

My greatest hope is to be remembered for restoring trust, integrity, transparency, verifiability, and ease of voting to elections, and being the Secretary of State that resurrected hand counts at the precinct level and eliminated computerized vote tabulation by proving them unsecure, error prone, and an unnecessary cost burden to the voters.
